OBJECTIVE / SUMMARY

- **Motivated and creative Full Stack Developer with proven expertise in the MERN stack, UI/UX design, and cloud platforms like GCP and AWS. Adept at delivering performance-optimized web applications with seamless user experience. Experienced in collaborating with diverse teams and managing end-to-end development, from design to deployment.**

WORK EXPERIENCE

- **FREELANCER - Technical Development / Designing(UI/UX)** January 2024 - Present
 - Developed custom MERN stack applications tailored to client specifications with full deployment and maintenance.
 - Designed pixel-perfect interfaces using Figma and Adobe Creative Suite.
 - Optimized codebase for performance and SEO, implemented responsive UI across all devices.
- **WCOOPEF - Graphics Designing & Social Media** January 2025 - Present
 - Created visual content for social campaigns and digital promotions, improving engagement by 35%.
 - Strategized design workflows aligned with event objectives and managed creative assets.
 - Handled content scheduling, cross-platform branding, and analytics for social media.
- **EXPLOTXPLORERS - Community Coordinator | Ahmedabad** December 2023 - April 2025
 - Led web development using MERN stack for internal and community platforms.
 - Conducted and facilitated workshops on UI/UX design and full-stack development.
 - Maintained community engagement through online events, sessions, and hackathons.
- **IEEE SOU SB - Creative Committee Chairperson | Ahmedabad** January 2024 - September 2024
 - Directed creative design efforts for university events, from concept to execution.
 - Led a team of 8 designers to maintain branding consistency and design strategy.
 - Produced digital banners, event posters, presentation decks, and branding kits.
- **GDSC SOU - Graphics Designer | Ahmedabad** December 2023 - August 2024
 - Designed impactful visuals for coding bootcamps, workshops, and speaker sessions.
 - Collaborated with tech and outreach teams to deliver timely creative content.

TECHNICAL SKILLS

- | | | | |
|-----------------|--------------------|--------------|-------------------|
| • C & C++ | • MS Office GSuite | • Agile | • Communication |
| • Bootstrap | • Power Bi | • Sketchup | • Leadership |
| • Java | • Illustrator | • PremierPro | • Problem Solving |
| • Python | • Ui/Ux & Figma | • GCP | • Creativity |
| • Dart (Basics) | • Wordpress | • Agile | • Adaptability |
| • JavaScript | • AfterEffect | • Jira | • Firebase |
| • Html - CSS | • FlutterFlow | • Typescript | • FlutterFlow |
| • Git/Github | • GCP | • DSA in C | • MySQL/SQL |
| • M.E.R.N Stack | • AWS (Basics) | • OOP | • REST APIs |

ACADEMIC DETAILS

- | | |
|--|------------------------|
| • Bachelor of Technology (CE) Silver Oak University SPI : 9.4 | August 2023 - May 2027 |
| • XII (PCM - GSEB) The Imperial Science School | June 2022 - May 2023 |
| • X (GSEB) The Imperial Science School | April 2020 - May 2021 |

GLOBAL PARTICIPATION & WINNING

- | | |
|---|--------------------------------|
| • IEEE SUMMER CODE QUEST UI/UX AND FRONT-END EDITION | 2nd Position - (1st Runner-UP) |
| • RHA INDIA CHALLENGE 2024 | 1st Position & Winner |
| • IGNITE E-CELL TECH FEST | 2nd Position |

CERTIFICATIONS

- | | |
|---|---|
| • C C++ Animation & Graphics HTML & CSS & JS | Udemy |
| • Java & WordPress Certificate | SkillzCafe |
| • Flutter Basics And Frontend Certificate | GDSC SOU |
| • Graphics & UI/UX Designing Certificate | BP Udemy Forage |
| • AWS Educate Introduction to Generative AI | Credly |
| • Introduction to OpenShift Applications (DO101) | RedHat |
| • Google Cloud Fundamentals & Security Certificate & 101+ Badges | Google Cloud Skill Badges |
| • GitHub Foundations AWS Educate Introduction 51+ Badges | Credly |

PROJECTS

- **ExploitXplorers Community | HTML , CSS , JS , JQUERY** **Industrial Projects**
 - **Tech Stack:** MERN, HTML, CSS, JavaScript, jQuery, JWT, GCP Cloud Run, GitHub Actions, Terraform, Kubernetes, Cloud Monitoring
 - **Deployment:** GCP Cloud Run with full CI/CD automation
 - Developed front-end UI with HTML/CSS/JavaScript and dynamic behaviors using jQuery.
 - Created a secure backend with Express.js and MongoDB, using JWT for authentication and authorization.
 - Implemented RESTful APIs for user interaction, forum management, and resource uploads.
 - Integrated GitHub Actions for CI, GCP Cloud Build and Cloud Run for scalable deployments.
 - Infrastructure managed using Terraform and deployed via Kubernetes for high availability.
 - Set up Google Cloud Monitoring and Logging for uptime, usage, and error tracking.
 - Website: exploitxplorers.in
- **RAY Infrastructure Pvt. Ltd. | Graphics Designing & UI/UX** **Industrial Projects**
 - **Tech Stack:** React.js, Redux, REST API, AWS S3, AWS Elastic Beanstalk, Jenkins CI/CD
 - **Role:** UI/UX Designer + Frontend Developer
 - **Deployment:** AWS Cloud with Jenkins CI/CD
 - Designed modern UI/UX interfaces and wireframes using Figma and Adobe XD, tailored to the brand identity. Developed a fully responsive website with advanced state management using Redux.
 - Integrated REST APIs for lead generation and content management.
 - Utilized AWS S3 for static assets and deployed the site via AWS Elastic Beanstalk.
 - Configured Jenkins pipelines for automated builds, testing, and deployment.
 - Website: www.rayinfra.in

- **Prescripto : Hospital/Clinic Appointment System | MERN**

Project : [Github](#)

- **Tech Stack:** MERN, Redux, JWT, GCP Cloud Run, Cloud Functions, Appwrite, Cloudinary, Jest, Cypress
- **Deployment:** GCP Cloud Run with Notifications via Cloud Functions
- **Load Tested:** 1000+ concurrent users | 99.9% uptime | 30% speed improvement
- Designed with a mobile-first UX and validated through usability testing sessions.
- Integrated JWT-secured REST APIs for authentication, appointments, and profile management.
- Implemented Redux for global state management across multiple user roles (Admin, Doctor, Patient).
- Notifications and reminders handled via GCP Cloud Functions.
- Images and reports uploaded securely with Cloudinary and Appwrite backend services.
- Used Jest and Cypress for test-driven development (TDD) and automated testing.
- Website: [Demo Link](#)

- **Storage Platform - Clone MEGA & Google Drive | MERN**

Project : [Github](#)

- **Tech Stack:** MERN, React, AES Encryption, WebSockets, OAuth2, JWT, AWS S3, AWS Lambda, EKS, Jenkins CI/CD
- **Deployment:** AWS Lambda + EKS Cluster + S3 Storage + Jenkins
- File uploads encrypted with AES before cloud storage for privacy and security.
- Real-time sync between users and devices using WebSockets.
- OAuth2 and JWT authentication implemented for secure multi-user access.
- Serverless functions using AWS Lambda for scalable processing of file uploads and access logs.
- Containerized backend deployed on AWS EKS with auto-scaling and high availability.
- CI/CD pipeline established with Jenkins for zero-downtime updates.
- Integrated 8+ APIs including PDF viewer, image preview, and shared file links.
- Website: [Demo Link](#)

VOLUNTEER WORK

- **CCE - Silver Oak University** - Designing, Management, Developer, Outreach
- **AWS CLOUD CLUB SOU** - Designing, Management, Developer
- **GOOGLE DEVELOPER GROUPS & CLOUD GROUP (Ahmedabad | Gandhinagar)**
